Professional Summary

Computer Science Engineering student with hands-on experience building backend and full-stack applications using Python, FastAPI, PostgreSQL, React, and Docker. Experienced in REST APIs, asynchronous backend services, data-driven applications, and production-oriented software, with a strong foundation in Data Structures & Algorithms, OOP, DBMS, Operating Systems, and Computer Networks. Passionate about writing reliable and maintainable software.

Education

Acharya Institute of Technology, Bengaluru 2023–2027
Bachelor of Engineering (B.E.) in Computer Science & Engineering CGPA: 8.54

Technical Skills

- **Languages:** Python, Java, JavaScript
- **Backend/Frameworks:** FastAPI, REST APIs, React
- **Databases:** PostgreSQL, MySQL, Redis, pgvector
- **Developer Tools:** AWS, Git, Docker, Linux, Postman
- **Testing:** API Testing
- **AI/ML:** Machine Learning, NLP, RAG, LangChain, Ollama
- **Core CS:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Projects

Vermithor – AI-Powered Production Incident Intelligence Platform GitHub
Python, FastAPI, Docker, Celery, PostgreSQL, pgvector, Redis, HDBSCAN, Ollama

- Built a backend platform for analyzing production logs, metrics, and traces, using anomaly detection and clustering to identify related incidents.
- Designed asynchronous services with FastAPI, Celery, Redis, and PostgreSQL for incident processing, historical failure retrieval, and automated troubleshooting.

Namma Connect – AI-Powered Agritourism Marketplace GitHub
Python, FastAPI, React, PostgreSQL, Redis, Docker, pgvector, Gemini API

- Built a full-stack marketplace with role-based User and Provider workflows for service discovery, listing, and booking using React, FastAPI, and PostgreSQL.
- Designed backend APIs and data workflows for recommendations and trip planning, integrating Redis, PostgreSQL, pgvector, and Gemini.

WatchMan – Personalized Movie Recommendation System GitHub
Python, FastAPI, React, Docker, Celery, TMDB API, Hybrid Recommendation

- Developed a full-stack recommendation application using FastAPI and React, integrating TMDB with a hybrid recommendation engine based on content and user-preference signals.
- Implemented asynchronous processing with Celery and containerized backend workflows using Docker.

Manan AI – AI Chat & Document Intelligence Platform GitHub
Python, FastAPI, Docker, PostgreSQL, pgvector, LangChain, Hugging Face, Gemini, Ollama

- Developed a document intelligence platform using FastAPI, PostgreSQL, Docker, and vector search for document ingestion, OCR, semantic retrieval, and contextual conversations.
- Implemented document-grounded retrieval and persistent conversation context across user sessions.

Achievements & Activities

- Solved 100+ Data Structures and Algorithms problems on LeetCode.
- Participated in 4+ hackathons, collaborating in teams to design and develop AI and full-stack prototypes under tight deadlines.

Certifications

Oracle University: AI and Gen AI | **LinkedIn Learning:** Foundations of Cloud Computing
